

## OUR CSR APPROACH

In keeping with our fundamental principles and values, Di Sante's Board of Directors has decided to embark on a CSR process.

This commitment reflects our deep-seated conviction that a sustainable, high-performance company must go beyond its economic objectives and take full account of its impact on society, the environment and its local area. By adopting this voluntary approach, we are affirming our ambition to :

- > Strengthening our local roots
- > Protecting our tribe
- > Reducing our environmental footprint
- > Promoting ethical and sustainable relations

This approach is not an obligation, but an opportunity. It is a natural part of our company's history and commitments, and marks our desire to prepare for the future. By committing ourselves to CSR, we hope not only to strengthen our positive impact, but also to embody an ambitious and responsible vision of the role of business in society.

Together, with our tribe and our partners, we are forging a safer, more responsible and more prosperous future for everyone.

# HIGH-QUALITY SERVICES IN A SAFE AND CAREFUL WORK ENVIRONMENT

## Di Sante, a key player in the Dunkirk industry...

Founded in 1991, Di Sante has historically specialised in mechanical engineering, boilermaking and maintenance..

Drawing on its experience and in-depth knowledge of industrial and maritime environments, Di Sante provides you with technical solutions in line with your specifications.

Our team manages your highly technical industrial projects, from design to completion and commissioning.

Strongly committed to Quality, Safety, the Environment and Corporate Social Responsibility, our team of 50 employees is involved in both risk prevention and the impact of its day-to-day actions on its environment.

## Excellence as the main objective

The real driving force behind our team's day-to-day work, excellence is expressed as much in our technical expertise as in our work supervision and risk prevention.

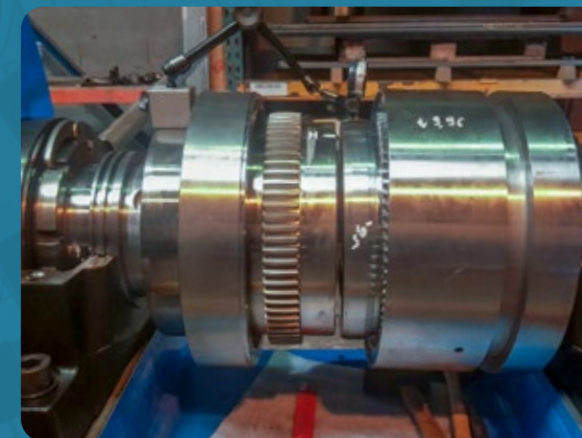

Di Sante's production capacity, the expertise and rigour of its teams, and its investment in technology offer tailor-made solutions to its customers in the fields of metallurgy, steelmaking, oil and gas and ship repair.

## MECHANICS

Di Sante stands out for its expertise and advanced technical capabilities in large dimensions..

Di Sante makes customised mechanical parts to meet the specific needs of its customers. Whether for heavy industry, the naval sector or the energy industry, the company is capable of producing large, complex technical parts with precision.

We not only machine, but also assemble the assemblies produced.

## BOILERMAKING

Di Sante excels in the field of industrial boiler making. It offers a full range of services that meet the needs of the metallurgy, steelmaking, oil and gas industries, and much more besides...

Di Sante makes bespoke boiler parts, tailored to the precise specifications of its customers.

Every part manufactured or repaired undergoes rigorous inspections to ensure compliance with the highest quality and safety standards.

We work to drawings, but we are also capable of carrying out studies on all types of lifting equipment, right through to CE certification and commissioning tests.

## MAINTENANCE

Di Sante offers a range of industrial maintenance services that are essential to ensuring the smooth operation and longevity of its customers' facilities.

Whether preventive or remedial, Di Sante works on site to perpetuate or repair its customers' installations.

Di Sante also provides expert appraisal and reconditioning of your tools in the workshop..
